Safeguarding Education

We are committed to ensuring children are kept safe in school and that they learn how to keep themselves safe from harm. Some areas of Safeguarding are explicitly taught in subjects, but other areas of safety awareness are taught through culture, assemblies and real-life experiences.

School Culture and Assemblies
Through school culture, children are taught that:
- Adults in school can be trusted and will do all they can to keep them safe.
- They must never leave the school site without an adult.
- They must close doors behind them to keep the building secure.
- They should keep our environment safe by keeping it tidy and letting staff know of anything unsafe.
- Everyone is entitled to privacy when using the toilets.
- We don't keep secrets.
- They should have an age-appropriate understanding of consent.
- It is important to demonstrate acceptable behaviour and how it affects others.
- It is important to have emotionally literacy to express yourself clearly.
- We should all make the right choices to ensure we are all safe, calm and ready.
- Following instructions is expected and important because it keeps everyone safe.
- We all care for each other and should help people in need.

Trips
- Road safety and being aware of your environment helps to keep you safe.
- Wearing appropriate clothing for an activity incl. sun cream.
- Staying with your adult is important.

Safeguarding within the Curriculum

PSHRE
- Identify and respect differences and similarities between people.
- Safe people in the community.
- Anti-Bullying week, what bullying is and how to respond to it.
- Forming positive relationships.
- Respecting yourself and others.
- That family and friends should care for each other.
- Some diseases spread and can be controlled.
- That all household products, including medicines can be harmful if not used properly.
- The basic needs of animals, inducing humans, for survival (water, food and air).
- The importance for humans to exercise, eat the right amounts of food and keep personal hygiene.
- Making choices that improve their health and wellbeing and how to maintain personal hygiene.

Computing
- E-safety is taught across the computing curriculum throughout the year.
- All classes sign up to the acceptable user agreement which details safe and respectful use of technology. The home/school agreement also ensures that adults and children understand that acceptable use of technology is agreed and expected.

Other Subjects
- That some equipment and tools can be dangerous if not used correctly.
